

## SKILLS

**PROFICIENT:** Ruby on Rails, Ruby, Javascript, CSS, HTML5, JQuery, AJAX, Sinatra, Photoshop, Git

**EXPOSURE:** React.js, Scala, Python

## SUMMARY

Full Stack Developer experienced with technologies including Ruby on Rails, Ruby, React, JQuery, AJAX, and Javascript. Self motivated and a team player with full confidence to communicate workflow and build out purposeful applications. Also experienced in photoshop and creating concept designs and artwork. Seeking an opportunity to expand my knowledge on web development. Welcomes challenges with a promise to thrive and deliver superior results.

## PROJECTS

### GUIDEME

GuideMe is a Ruby on Rails application built in eight days for travelers who would like to find a guide in a specific city. It's meant for an easy way for travelers to book a guide and communicate with them instantly. My role in this project was a full stack developer. I was responsible for creating the routes, database associations, styling, logic, and implementing various APIs including Google Maps, Yelp, and Pixabay.

### VEGGIEMON GROW (2ND PLACE WINNER AT FOOD HACKATHON + FORUM)

Veggiemon Grow is a web application that promotes kids to eat healthier and exercise. Kids can scan barcodes of healthy items in stores to potentially find new Veggiemon to battle and collect! Local parks and farmers markets will have special Veggiemon and points for kids to explore and earn. As a full stack developer I helped build this website using Ruby on Rails, Javascript, Google Maps API, and Yelp API. I also created the artwork for this website.

### RAINY DAY SCIENCE (SCIENTIFIC DISCOVERY AWARD AT SCIENCE HACKATHON)

This application gives users the ability to find a list of science experiments they can perform based on household items they already have. I was responsible for building and styling components in React as well as creating the Rails backend and implementing the Google Maps API. We used Ruby on Rails, React, Javascript, and JQuery to develop this website.

### ART GALLERY

A solo project I created to showcase artwork I've done in the past using Ruby on Rails, CSS, Bootstrap, and Javascript. I implemented a carousel to give a fun visual experience for viewers. Clicking an image will open a modal that enlarges the picture and gives more information about it.

## EMPLOYMENT

### JETBLUE AIRWAYS

Airline Ramp Agent

2013 to 2015

- Responsible for maintaining the safety and security of the ramp at all times
- Directed aircraft on the ramp and marshaled aircraft through arrivals and departures
- Ensured prompt, accurate, and careful handling of customer baggage, airfreight, and company material
- Gained teamwork skills by working with others under a time limit and understanding the importance of working together as one team to get the plane out on time
- Developed new strategies of properly setting up airport equipment on the ramp to accommodate to aircraft in the best way
- Adapted to the specific safety procedures and special qualities of various aircrafts

## EDUCATION

### Dev Bootcamp | July 2016 - October 2016

19 week web development intensive program.

### University of North Carolina Charlotte, Charlotte NC | Aug 2013 - Dec 2013

non-degree holding in Graphic Design

### Wake Technical Community College | Aug 2011 - May 2013

Associate in Arts
